

Monthly Lecture Sponsorship

The Municipal Engineers of the City of New York (MENY) is celebrating its 120th anniversary this year. Members of this society include professional engineers, licensed architects, attorneys, and urban planners in both the public and private sectors, who share the common goal of guiding and promoting the development of infrastructure improvements within the New York metropolitan area.

To elevate the standards of proficiency of the technical services provided in the City of NY, The Municipal Engineers conducts monthly technical presentations by industry experts on projects and current technologies. The 2023 lectures series starts in September 2023 with the Wimmer Memorial Lecture in honor Mr. Robert A. Wimmer, where commissioners of city agencies are invited to talk about their programs and continues from October through May of 2024 with lectures provided by industry experts. PDH and refreshments are provided to the lecture attendees along with lots of opportunities to network with industry leaders and peers. There will be no lectures in the months of June, July, August, November and December.

The Municipal Engineers are soliciting Sponsorships of these monthly lectures to enable us to maintain our commitments while keeping pace with the ever-spiraling costs of operating in this great city.
